

Drawings:

Applicants have canceled all claims which included the vent means, thus the objection under 37 CFR 1.83(a) is not longer relevant.

Applicants request reconsideration and withdrawal of the drawing objection under 37 CFR 1.121(f) since the original disclosure included a spout and the exact configuration is immaterial to the invention. In addition, the original disclosure discussed several prior art arrangements, all of which included some form of a spout.
